PREPARATION FOR PET EXAMINATION:

- **Do not eat or drink** (except plain water) for six (6) hours before your appointment.
- **Do not smoke** on the day of your scan.
- **Bring along all your previous X-ray, Ultrasound, CT, MRI films or PET images/report and blood tests or biopsy reports, together with medication list.**
- Please do not exercise or engage in any strenuous activity or massage 24 hours prior to scan.
- There should be no change in your medication.
- **For Diabetic patients:**
 - **Do not take** oral diabetic medication or insulin injections **on the day of the scan** (however, please bring it along on the day of the scan).
 - Patient to have the usual diabetic medication or insulin injection the **day before the scan**.
 - Patient should arrive at our centre **30 minutes** before the appointment time to have their blood sugar checked.
- You can expect to be at our centre for 2 to 4 hours (depends upon the scan requested).
- Please be punctual. If you need to reschedule, please inform us **48 hours** in advance.
- If there is a possibility that you might be pregnant or if you are **breastfeeding**, please notify our staff before your examination.

Oncology Clinical Condition	When to Utilise F-18 FDG	Other Tracers	When to Utilise
Breast Cancer	<ul style="list-style-type: none"> ✓ Assessment of metastases ✗ not indicated for primary diagnosis ✗ not indicated for initial staging of axilla ✓ Determine treatment response ✓ Assessment of recurrence 	F18-Sodium Fluoride Bone Scan	<ul style="list-style-type: none"> ✓ Metastatic disease in skeleton ✓ Primary bone tumours ✓ Bone pain ✓ Back pain ✓ Infection ✓ Trauma or stress fracture ✓ Arthritis
Cervical Cancer	<ul style="list-style-type: none"> ✓ Initial staging following negative or equivocal CT or MRI ✓ Determine treatment response ✓ Guide radiotherapy planning 	C-11 ACETATE with FDG PET/CT Scan (Dual)	<ul style="list-style-type: none"> ✓ Assessment of HCC
