

MAGNETOM Lumina

EXCEPTIONAL Images.
EXTRAORDINARY Patient Care.

MAGNETOM Lumina is the new 3T MRI that provides the latest technology and highest quality MRI examination available today. Powered by Siemens Healthineers premium MR technology, MAGNETOM Lumina combines our unique BioMatrix technology, the new syngo MR XA software platform, and our exclusive Turbo Suites to fundamentally transform care delivery.

AN INDUSTRY-LEADING MRI
NOW AVAILABLE AT RADLINK DIAGNOSTIC IMAGING

Redefine the MRI experience

MAGNETOM Lumina is designed to redefine the patient experience. With a larger bore, it minimizes feelings of claustrophobia and replaces the anxiety with a sense of confidence and comfort thanks to its noise reduction capabilities allowing patients to remain relaxed and at greater ease during the scan.

Enhance for patient care

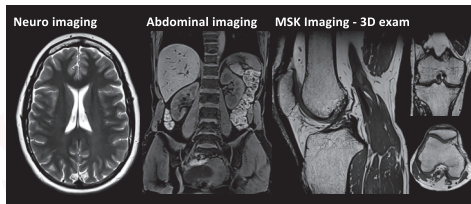

Reduce claustrophobia with a larger bore size

Strong support for patient comfort with Tim 4G ultra-light technology and high-density coils

Exceptional sound quality for voice commands

Effective noise reduction with unique memory foam pillow

Multiple regions scanning made possible

Automated reproducibility with Dot Engines
